Cytolysis, or osmotic lysis, occurs when a cell bursts due to an osmotic imbalance that has caused excess water to diffuse into the cell. Water can enter the cell by diffusion through the cell membrane or through selective membrane channels called aquaporins, which greatly facilitate the flow of water. It occurs in a hypotonic environment ...

Cytolysis - Wikipedia

Chromosomal translocations occur when a part of one chromosome is incorrectly fused to a segment of another chromosome. The danger of these types of mutations is the possibility for gene fusions. The most common example of this is the Philadelphia chromosome which occurs in some types of leukaemia.

Types Of Mutations | Points, Substitution | A Level Biology

The nervous system is a network of nerve cells and, in most animals, a brain. In vertebrates, it also includes a spinal cord. The primary cell type found in the nervous system is the neuron , which has a cell body, containing the nucleus , and long extensions to carry information from one part of the body ...
