The Lambert W-function, also called the omega function, is the inverse function of  $f(W)=We^W$ . (1) The plot above shows the function along the real axis. The principal value of the Lambert W-function is implemented in the Wolfram Language as `ProductLog[z]`. Different branches of the function are available in the Wolfram Language as `ProductLog[k ...`

There is intense interest in graphene in fields such as physics, chemistry, and materials science, among others. Interest in graphene's exceptional physical properties, chemical tunability, and potential for applications has generated thousands of publications and an accelerating pace of research, making review of such research timely.
