The history of water supply and sanitation is one of a logistical challenge to provide clean water and sanitation systems since the dawn of civilization.

### **History of water supply and sanitation - Wikipedia**

An aqueduct is a watercourse constructed to carry water from a source to a distribution point far away. In modern engineering, the term aqueduct is used for any system of pipes, ditches, canals, tunnels, and other structures used for this purpose. The term aqueduct also often refers specifically to a bridge on an artificial watercourse. The ...
